Projects

Cryptocurrency Tracker and Analyzer web app |
<https://github.com/Shardul12345/crypto-tracker-and-analyser>

- The "Cryptocurrency Tracker and Analyzer" web app, developed using React.js, is a powerful tool designed to provide users with an intuitive and comprehensive platform for tracking and analyzing various cryptocurrencies in real-time.

- Front end of the project is created with HTML, CSS, and JavaScript, and the real time data of cryptocurrencies are fetched through the "COINGECO" API.
- The heart of the app is a sleek coin table that displays crucial information about cryptocurrencies, including their current prices, 24-hour price changes (expressed as percentages), and market capitalizations.
- Users can explore detailed price charts for specific cryptocurrencies, tracking their performance over customizable timeframes to make informed decisions.
- The app offers a personalized watchlist for users to track their chosen cryptocurrencies, providing real-time updates and introducing a Priority Watchlist for active investment management, including setting priority levels and attaching personal notes.
